

Lab: Manage your account - Part 2

Manage OAuth access tokens

OAuth access tokens allow you to use a Confluence gadget on an external web application or website (also known as the 'consumer') *and* grant this gadget access to Confluence data which is restricted or privy to your Confluence user account.

OAuth access tokens will only appear in your user profile if the following conditions have been met:

1. Your Confluence administrator has established an OAuth relationship between your Confluence site and the consumer.
2. You've accessed a Confluence gadget on the consumer and have completed the following tasks:
 - a. Logged in to your Confluence user account via the gadget
 - b. Clicked the **Approve Access** button to allow the gadget access to data that's privy to your Confluence user account

Confluence will then send the consumer an OAuth 'access token', which is specific to this gadget. You can view the details of this access token from your Confluence site's user account.

An OAuth access token acts as a type of 'key'.

As long as the consumer is in possession of this access token, the Confluence gadget on the consumer will be able to access Confluence data that's both publicly available and privy to your Confluence user account.

As a Confluence user, you can revoke this access token at any time.

All access tokens expire after seven days. Once the access token is revoked or has expired, the Confluence gadget will only have access to publicly available Confluence data.

View your OAuth Access Tokens

To view all of your Confluence user account's OAuth access tokens:

1. Choose your profile picture at the right side of the navigation, then choose **Settings**
2. Click **View OAuth Access Tokens**

OAuth Access Token Details

Your list of OAuth access tokens is presented in a table, with a row for each access token and a column for each property:

Column Name	Description
Consumer	The name of the Confluence gadget that was added on the consumer.
Consumer Description	<p>A description of this consumer application. This information would have been obtained from the consumer's own OAuth settings when an OAuth relationship was established between Confluence and that consumer.</p> <p>If the consumer is another Atlassian application, this information is obtained from the Consumer Info tab's Description field of the OAuth Administration settings. The application's administrator can customize this Consumer Info detail.</p>
Issued On	The date on which the OAuth access token was issued to the consumer by Confluence. This would have occurred immediately after you approved this gadget access to your Confluence data (privy to your Confluence user account).
Expires On	The date when the OAuth access token expires. This is seven days after the "Issued On" date. When this date is reached, the access token is automatically removed from this list.
Actions	For revoking the access token.

Revoke your OAuth Access Tokens

To revoke one of your OAuth access tokens:

1. View your Confluence user account's OAuth access tokens (described above).
2. Click **Revoke OAuth Access Token** for the OAuth access token you want to revoke.

The gadget's access token is revoked and the Confluence gadget on the consumer will only have access to publicly available Confluence data.

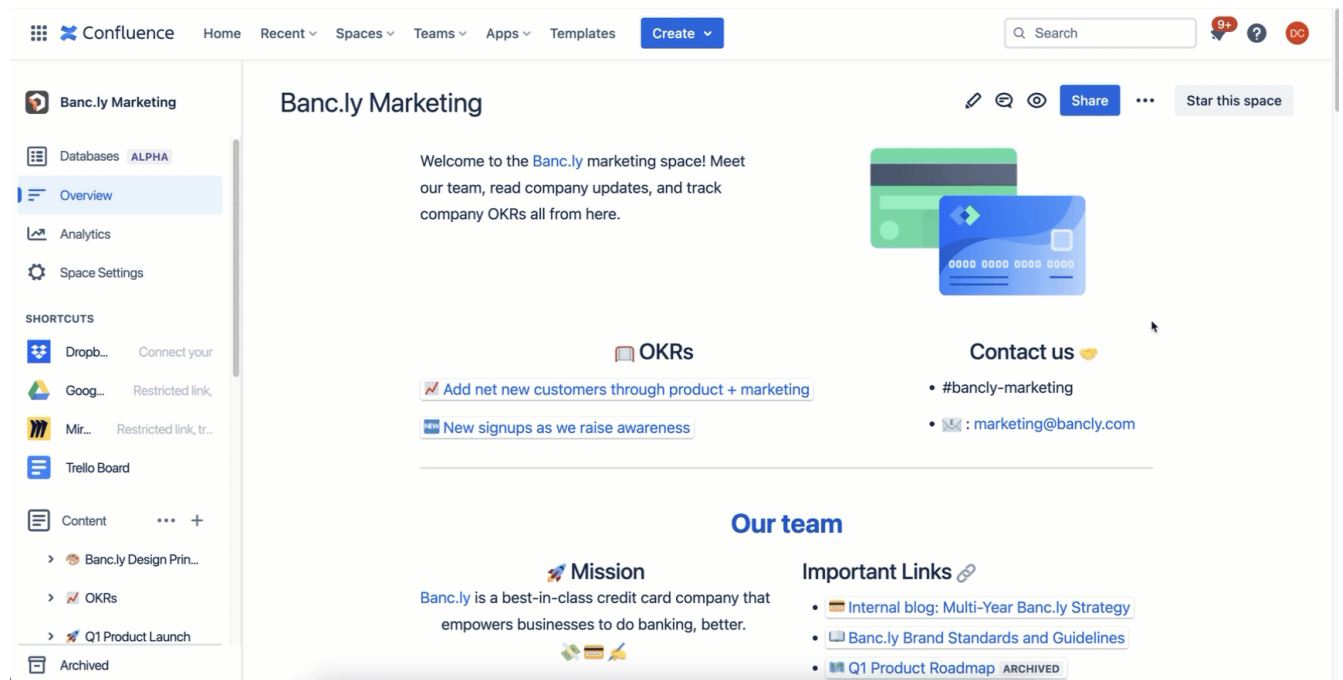

Change your theme

You can set a theme to change how Confluence looks.

To change your theme:

1. Select your profile avatar at the right of the navigation bar, then select **Theme**.
2. Select one of the theme options:
 - **Light:** Sets Confluence to display in lighter colors. This is the default theme.
 - **Dark:** Sets Confluence to display in darker colors.
 - **Match Browser:** This will match the theme you set in your browser. If you don't have this set, you will see the default theme.

The theme you select will be saved to your account, so your choice will apply even if you use Confluence on another device.

Themes change your current view of Confluence and don't impact how a reader sees your page.

Admin-driven themes

If you switch to Dark theme and your top navigation bar doesn't look right, your admin may have set custom colors that don't work well with Dark theme. Contact your admin to update the colors.

Set your email visibility

On your Atlassian account settings, you can control who can see your email address.

To set your email visibility:

1. Tap your profile picture at the right of the navigation, then select **Settings**.
2. Select **Profile and visibility** on the left sidebar.
3. Scroll down to the **Contact** section.
4. Choose one of the options from the **Who can see this?** dropdown:
 - a. **Anyone**: visible to anyone who can view your content, including people outside of the Atlassian organization. Accessible by installed apps.
 - b. **Your organization**: only visible to people who have access to your organization.
 - c. **Only you and admins**: only visible to you and admins. To manage access to Atlassian products and services, admins need to view your email address too.

Note: setting options can vary by type of account.

Your new settings will be saved automatically.
